

Commercial Indoor Air Quality

PureAir products and services improve indoor air quality in many facilities such as...

Museums & Archives

PureAir systems provide highly effective removal of urban pollutants for the protection of precious archives and priceless artwork.

Restaurants

PureAir prevents commercial kitchen exhaust odors from entering the building, or bothering neighbors.

Airports

PureAir systems capture jet fumes from airport terminals to ensure harmful fumes will not cause discomfort or exceed recommended levels.

Casinos, Hotels & Pools

PureAir ensures the comfort of guests and personnel by capturing and removing unpleasant odors.

Hospitals & Other Healthcare Facilities

PureAir prevents helipad fumes from endangering patients and employees located within the building. Also provides excellent odor control for morgues.

Office Buildings

PureAir removes unwanted gases and odors from high traffic commercial areas, like business offices.

CASE STUDY

Click here to read about Christie's Fine Arts Storage

Christie's Fine Arts Storage

Services provide climate controlled high security for fine art, antiques, and collectibles. Requirements for the auctioneer's storage services include controlled air and top-of-the-line technology. To meet Christies' set airflow requirements, PureAir installed a Packaged Filter Unit (PFU), which re-circulates the air inside the storage center and super purifies the urban air to protect precious items for long storage. The PFU was so successful that Christies wrote their storage air specifications around the unit.

NOTABLE CUSTOMERS

- Christie's Fine Arts Storage
- CNN
- George HW Bush International Airport
- Georgia State Archives
- Google
- Harvard University
- Louisiana State Archives
- NASA
- New Balance

ADSORBENT MEDIA

PureAir offers a variety of chemisorbant media to remove specific gases that cause harm in commercial facilities. In particular, the blended media offers a wide range of gas removal capabilities and are UL rated.

PureAir engineers and manufacturers gas-phase filtration systems to meet the ANSI/ISA Standard 71.04-1985 environmental conditions for air quality to protect electronics from airborne contaminants.
